iCONIC 25+

Brand new for 2011, The iCONIC 25+ brings new levels of picture quality to mobile LED screens, with an ultra-high resolution 12mm 25m² 16:9 LED screen.

Its built on the same pioneering lightweight urban chassis as our standard iCONIC 25s, giving an elegant design, whilst maximising its screensize to weight ratio.

The iCONIC 25 is the world's largest screen available on a non-HGV platform; a low kerb-weight, small footprint and outstanding manoeuvrability make it perfect for urban and city environments.

Like all iCONICs, there are full branding opportunities along the trailer sides.

Weight	-	5,500kg
Length	-	6,747mm
